1 Introduction

Land for New Homes is Stafford Borough Council's annual housing land availability monitor. The monitor provides an analysis of the provision of new dwellings required by the Development Plan for Stafford Borough, which comprises the Regional Spatial Strategy (RSS), Staffordshire County Council and Stoke on Trent City Council Structure Plan and the Stafford Borough Local Plan (SBLP 2001). This position is expected to change during 2011-2012 with the passing of the Decentralisation and Localism Bill.

The current Structure Plan, which was adopted in May 2001 and has been "carried forward" under the "Saved Policies" procedure, requires Stafford Borough to identify sufficient land to cater for the development of 5600 new dwellings between 1996-2011; this monitor considers the whole plan period.

The Stafford Borough Local Plan, which has been carried forward under the Saved Policies procedure, provides further information regarding future housing provision within the Borough. However, ultimately the Local Plan will supersede the Local Development Framework (LDF). Consequently the Local Plan is still in force insofar as providing policy and guidance for the determination of planning applications is concerned.

In terms of the availability of further information on housing matters, the Stafford Borough Council Housing Strategy and associated documents provide broad background information on tenure types and broader housing related issues which are beyond the immediate remit of the Local Plan whilst a Strategic Housing Market Assessment (to underpin relevant planning housing policies and proposals) of the Borough has been prepared by the Council; collectively, these documents - in association with this Housing Monitor - constitute the Borough Council's corporate approach to housing policy and related issues.

2 Housing Monitor Methodology

The housing monitor data is obtained from a number of sources in order to identify:-

- The number of dwellings built in particular during the previous twelve month period (1 April 2010 - 31 March 2011) but also cumulatively since the commencement of the current Local Plan period
- The number of dwellings commenced during the same period
- The total number of dwellings which could be built by virtue of having permission for residential development (NB: A separate count is taken of sites where there has been a resolution to grant consent subject to prior completion of a Section 106 Agreement but where the Agreements have yet to be completed - these sites are notated as "HA" (i.e.. held in abeyance) and are grouped together within Appendix A)
- The outstanding number of dwellings capable of being built on sites granted consent but which have not yet been completed
- Sites allocated in the SBLP 2001 but without an extant planning permission are not included as commitments – the full listing of the residential allocations is reproduced in Section 5 whilst Appendix B gives further information as to whether the sites have planning permission for residential development together with their "status" (i.e.. not started, under construction or completed)
- In all calculations throughout this document the gross number of dwellings is used in the preparation of diagrams from section 3.3 onwards.

Using the data collected the monitor presents an analysis of:-

- Completion/build rate by year, site size, site type, location and also "origin" of commitment (i.e.. whether it is an allocated or a windfall site);
- The level of "windfall" permissions (i.e.. dwellings on sites not allocated in the SBLP 2001) granted and the number of units built on such "windfall" sites.

All data collected in order to undertake the analysis set out in the monitor is provided in Appendix A which comprises a list of all sites with a valid planning consent that has yet to be fully implemented and/or has not lapsed, and also those sites which have been approved in principle but which are being held in abeyance ("HA") pending the signing of the requisite Section 106 Agreements. The information is taken from selected fields in the Council's Planning Application Monitoring System database. The listing in Appendix A shows each site's:

- Location
- Type i.e. “Greenfield” or “Previously Developed Land”

- Planning consent details i.e. application number, type and approval date
- Description and category of the proposal
- Capacity of site from the planning consent

Each time the Land for Homes monitor is produced it updates the listing of the preceding one by:

- Adding in new permissions given in the subject year (April 1 - March 31);
- Removing lapsed permissions (permissions previously granted, not implemented and during the year under consideration the permission expired);
- Identifying and recording the number of units on each site which have been built, together with a “running total” of completions (where appropriate) on those sites that are under construction;
- Removing from the list sites that have been fully completed within the period under consideration.
- In the current monitoring year there has been a large number of sites that had permissions previously granted, but have not been implemented, resulting in expiry. The full list of permissions that have expired in the current monitoring year can be viewed in Appendix D of this document

The final site listing for 2011 in Appendix A also provides information on the “origin” of each site and in that respect a site can fall into one of the following two groups:

“**Allocation**” - sites allocated for new residential development in the statutory local plan

“**Windfall**” - sites which come forward through the Development Control process without having been previously allocated for residential development in the statutory local plan

Site Types

“**Previously Developed Land**” – as per definition in PPS3 (extract from PPS 3: Housing given in Appendix C of this document); this can also be referred to as “Brownfield” land.

“**Greenfield**” - all sites which do not fall within the definition of previously developed land (see Appendix C for a fuller description of what constitutes Greenfield land).

3 Completions

3.1 Assessment against the Structure Plan

Of the 5,600 dwellings required by the current Staffordshire and Stoke on Trent Structure Plan (1996 - 2011) 6,690 or 119% have been completed since the plan period began in 1996. Consequently there is a zero requirement in terms of the number of new dwellings needed to be built in order to meet the policy figure.

Table 1 shows how this compares with the rate required for the whole plan period and the actual annual average.

Table 1 - Average Completion Rates during the Plan Period

Plan Period	Completion Rate (Number of dwellings / year)
Whole (1996 - 2011)	373
Annual average (1996 - 2011)	496
Remaining years (outstanding provision 2008 - 2011) or "Residual Average Provision"	0 NB: Structure Plan requirement of 5,600 dwellings exceeded by 1,343 units as at 03/11

Table 2 shows the number of dwellings completed each year since the plan period began whilst Figure 1 illustrates how yearly completions have fluctuated during the plan period, and how those compare with the average rate required to meet the Structure Plan requirement.

Table 2 - Number of Dwellings Completed by Year

Year	Actual Number of Dwellings Completed
1997*	323
1998	244
1999	698
2000	459
2001	647
2002	677
2003	567
2004	604
2005	321
2006	442
2007	449
2008	581
2009	518
2010	193
2011	220
Total	6943
Average for period 1997-2011	496

Figure 1 - Yearly Completions against the required Average for the Plan

Completions are dependent on two principal factors - land availability and market demand. Land availability mainly depends on local conditions, whilst market demand is influenced by broader factors such as prevailing interest rates and (correspondingly) buyers confidence.

The greatest number of completions within this plan period was between 1998 and 1999 - the high completion rate in that year and in the years thereafter partly reflects the adoption, in October 1998, of the Stafford Borough Local Plan (SBLP 2001) and

consequently the availability and implementation of large allocated sites. Clearly the completion rate since 1998 - 1999 has broadly been consistent (with the exception of both the first two years and also 2004-2005) well above the rate required to meet the current Structure Plan provision, and the annual average completion rate figure of 496 units for the period 1996 - 2011 represents 123 units or 32% in excess of the average rate required throughout the whole of the Structure Plan period.

Recent completions, in the last two years have fallen dramatically. This is principally due to external factors in the national economy and the availability of funding.

3.2 Assessment against the Regional Spatial Strategy

At the time of preparation of this Monitor, the Statutory Development Plan comprises of the adopted Stafford Borough Local Plan, the Staffordshire and the Stoke on Trent Structure Plan (as considered above) and the Regional Spatial Strategy (RSS).

Of the 5,602 dwellings required by the RSS between 2001 and 2021, 4,572 or 82% have been completed since the plan period began in 2001. For the 10 years remaining an annual average of 103 dwellings will need to be provided in order to meet the policy figure - this “residual” annual average development rate is therefore very significantly lower than the average annual development rate experienced hitherto, being some 23% of the average rate experienced since the commencement of the plan period.

Table 3 shows how this compares with the rate required for the whole plan period and the actual annual average.

Table 3 - Average Completion Rates during the Plan Period

Plan Period	Completion Rate (Number of Dwellings/Year)
Whole (2001-2021)	280
Annual Average (2001-2011)	457
Remaining years (outstanding provision 2011-2021) or “Residual Average Provision”	103

Table 4 shows the number of dwellings completed each year since the plan period began whilst Figure 2 illustrates how yearly completions have fluctuated in the first eight years of the plan period, and how those compare with the average rate required to meet the RSS requirement.

Table 4 - Number of Dwellings Completed by Year

Year	Actual Number of Dwellings Completed
2001 - 2002	677
2002 - 2003	567
2003 - 2004	604
2004 - 2005	321
2005 - 2006	442
2006 - 2007	449
2007 - 2008	581
2008 - 2009	518
2009 - 2010	193
2010 - 2011	220
Total	4572
Average for period 2001-2011	457

Figure 2 - Yearly completions against the required Average for the Plan

3.3 Geographical Breakdown

Figure 3 below gives a broad locational breakdown of completions on **all** sites since from 31st March 2010 to 1st April 2011.

Figure 3- Completions By Sub Area March 2011

During the last monitoring year, 71% of the total of completions have been in the urban areas of Stafford and Stone, with rural completions accounting for a significant 29% of total completions. As such, these proportions are similar to those obtained in the previous monitoring year. By way of comparison with the pattern of completions that has been evident within the plan period to date, it is evident that completions this year have slightly increased in the urban areas - from 68% last year up to 71% of total completions this year and conversely decreased slightly in the rural areas - from 32% of total completions last year down to 29% this year.

3.4 Completions by “Origin” of Commitment

Figure 4 shows completions by origin of commitment, i.e. the number of completions that occurred on either “Unallocated (Windfall)” or “Allocated” sites between 1 April 2010 and 31 March 2011.

The largest number of completions this year has (consistent with last year) been on unallocated (windfall) sites accounting for 100% of the total. This has remained the same from last year when completions on windfall sites accounted for 100% of total completions; conversely, there has been no completions on allocated sites in 2010 – 2011.

In terms of actual dwellings completed on unallocated (windfall) sites, there has been a slight increase of 14% from 193 in 2010 - 2011 to 220 in 2010 – 2011. However, this still falls considerably short of prior housing completion rates. The maintenance of consistently high levels of completions on “windfall” sites is reinforced by the rate at which “brownfield” (or “PDL”) sites have continued to come forward.

3.5 Completions by Site Type

Figure 5 shows completions by site type, i.e. “Greenfield” or “Previously Developed Land” (refer to Appendix C for definitions) between April 2010 and March 2011. Figures 5a and 5b show the Greenfield/PDL split by origin of completion (i.e. on Allocated and Windfall sites).

Figure 5 - Completions on Windfall sites by Site Type

Figure 5a - Completions on Allocated Sites by Site Type

Figure 5b - Completions on Windfall sites by Site Type

Planning Policy Guidance Note 3: Housing - published in 2000 - defined Previously Developed Land (PDL) at the national level and the monitoring of completions by site type has thereafter been given greater weight, with particular emphasis and importance being attached to the redevelopment of PDL for residential use. This approach was perpetuated in subsequent updates including the most recent Planning Policy Statement No 3: Housing published in June 2010.

Figure 5 shows that between April 2010 and March 2011 24% of total completions were on Greenfield sites - this represents a large increase compared to 13% last year. Figures 5a and 5b show the Greenfield/PDL breakdown by origin of completion - on allocated sites, there were no completions on Greenfield sites which is consistent with last year's situation, whilst by contrast Greenfield completions on unallocated (windfall) sites accounted for 24% (as against 13% last year) and completions on Previously Developed Land accounted for 76% of the total number of completions on such sites (compared to 87% last year).

Figures 5 and 5a show increased level of greenfield completions in the current monitoring in comparison to previous years. The principal reason for the dramatic increase in greenfield completions is largely due to the recent changes to the definition of Previously Developed Land (PDL) in Planning Policy Statement No 3: Housing (June 2010) that excludes private residential gardens from the definition of PDL. This results in land that was previously considered PDL to be now considered as Greenfield.

Table 8 and Figure 6 show the breakdown of windfall completions by site type for each year so far during this plan period. The total number of unallocated (windfall) completions and the proportion on Previously Developed Land has varied - however, in the first 15 years of the plan period on average there have been 337 windfall completions each year of which 69% or 236 have been on previously developed sites.

Note: Calculations before 2010-2011 monitoring year have been based on the definition of Previously Developed Land (PDL) in PPS 3: Housing (2006). However, all calculations in the 2010/11 monitoring year have been based on the updated definition of PDL set out in PPS 3:Housing (June 2010).

Table 8 - Breakdown of Windfall Completions

Year	No of Windfall Completions on PDL Sites	No of Windfall Completions on Greenfield Sites	Total Number of Windfall Completions	Percentage of Windfall Completions on PDL
1997	42	81	123	34
1998	139	30	169	82
1999	307	283	590	52
2000	160	135	295	54
2001	213	155	368	58
2002	180	75	255	71
2003	198	90	288	69
2004	251	183	434	58
2005	190	39	229	83
2006	282	103	385	73
2007	337	75	412	82
2008	511	69	580	88
2009	390	128	518	75
2010	167	26	193	87
2011	168	52	220	76
Average	236	102	337	69

It is particularly significant to note the difference in make-up of completions on PDL sites as against those on greenfield sites - of the 220 recorded completions on windfall sites, 76% were on PDL, as compared with 24% on greenfield sites.

Figure 6 - Windfall Completions by Site Type 1997-2011

4 Commitment Sites

Commitment sites are those sites, which have a planning consent or a consent subject to the completion of a Section 106 Agreement **and do include**, therefore, those **units that were actually under construction** at the time that this study was undertaken. Table 9 shows for each type of planning consent the number of outstanding committed dwelling units and gives the Borough's total for 2010/2011. The total has decreased by 3% - from 3,167 (2009/2010) to 3,077 (2010/2011).

Table 9 - Number of outstanding commitments as at 31 March 2011

Consent Type	Outstanding Committed Units	Percentage of Total
Full / Reserved Matters	1,579	51
Outline	873	28
Extensions of Time	94	4
Pending (s 106)	531	17
Total	3,077	100

Table 9 shows that a large percentage of outstanding commitments (51% or 1,579 units) of the total commitments have full planning or reserved matters consent and therefore have no planning constraints to prevent their full implementation.

The number of outstanding committed units with outline consent has decreased by 23% this year - from 1,136 to 873. In addition, a new category 'Extensions of Time' has been introduced for planning applications that have been renewed in the current monitoring year.

Likewise, the number of outstanding committed units that are on sites that are the subject of Section 106 Agreements has also increased by 129% from 231 units to 531 units.

Figure 7- Outstanding Commitments Planning Status at March 2011

Key:-

Full/rm = Full Planning consent / reserved matters

Extension of Time = Previous Planning applications that have been renewed for a specified time period

Outline = Outline permission

Pending s 106 = Pending completion of Planning Obligation under Section 106 of the Town and Country Planning Act 1990

Figure 8 shows the origin of housing commitments as at March 2011 - from this it can be readily appreciated that windfall sites account for all commitments and this is consistent with last year, as is zero for the number of committed units on allocated sites.

Figure 8: Origin of Commitment*

Figure 9 shows the outstanding commitments by site type at March 2011 - of the outstanding commitments, 79% are on Previously Developed Land (PDL) with the remaining 21% on Greenfield sites (whilst the absolute numbers for each source are, not surprisingly, different from last year the actual percentage contribution from each source remain similar this year). Figure 9 can be compared to Figure 5 above that shows completions this year by site type. Actual completions on Greenfield sites accounted for 24% of total completions in 2010/2011, and the Greenfield/PDL split of the current stock of commitments indicates that this level of completions on Greenfield sites is likely to be at a slightly lower level in years to come given that Greenfield sites account for only 21% of the total committed supply as at 31 March 2011.

Figure 9- Outstanding Commitments by Site Type

Note: The data used for figure 9 takes account of the changed definition of PDL/ Greenfield set out in PPS 3: Housing (June 2010)

Figure 10 illustrates actual and average outstanding commitment rates so far this plan period. Between 1998 and 2000 the number of outstanding commitments increased significantly - this increase reflected the adoption of the Local Plan in 1998 and consequently the availability of large allocated sites; however, since the peak in the number of outstanding commitments in 2000 the “not started” commitment stock had been declining as large sites were completed and not replaced, although the number of extant commitments has remained significantly higher than at the start of the plan period. It is clear that there was an inordinately large and unprecedented increase in the level of outstanding commitments at March 2007 in comparison with every preceding year since the commencement of the Structure Plan period in 1996. The Borough Council ceased to monitor the number of residential units under construction in 2006 in favour of monitoring the actual number of units, since it is felt that this is a more distinct indicator of the amount of new housing development that has taken place within a given year - as a consequence, there are no separate figures for the number of units under construction for 2006 and onwards. The level of outstanding committed housing supply decreased slightly from 3,167 in 2010 in comparison with 3,077 units as at 31st March 2011, which represents a 3% decrease in the overall residential supply from 2010.

Figure 10 Outstanding Commitments April 1997- March 2011

5 Local Plan Allocations

Appendix B gives a complete list of SBLP 2001 allocations. The sites are **not included as commitments in the housing monitor unless they have planning permission or a resolution to grant consent.**

The following sites in the Stafford Borough Local Plan 2001 have been granted planning permission or have been subject to a resolution to approve subject to the prior completion of a Section 106 Agreement and in all cases (except for Site HP11) the permissions have been implemented (to date, HP11 has been only partially implemented). Appendix B gives further information concerning the “status” of all the allocated sites - i.e. whether they are under construction, completed or with planning permission and not yet started.

		Number of dwellings referred to in Local Plan
HP1	Land at the former BRC Works, Stafford	300
HP2	North of Baswich, Stafford	280
HP4	Land at Burton Bank Lane, Stafford	35
HP5	Land at MAFF Offices, Newport Road, Stafford	30
HP6	Land at Pioneer Concrete, Silkmore Lane	45
HP7	Land at Douglas Removals Site, Rickerscote Road, Stafford	12
HP8	Land adjacent to 87 Queensville	12
HP10	Land to south of Baswich, north of Milford Road, Stafford	100
HP11	Land north of Tixall Road, Stafford	120
HP14	Land at Whitebridge Lane, Stone	300
HP15	Land at Parkhouse, Stone	29
HP16	Land to south of Common Lane, Stone	80
HP18	Land at Blythe Bridge	15
HP19	Land at Haughton (west of Station Road)	16
HP20	Land at Haughton (between Jolt Lane and Park Lane)	13
HP21	Land at Hixon Church Road/Mount Road	35
HP22	Land at Hixon, west of Church Lane	40
	Total	1462

6 Windfalls

Sites which come forward through the Development Control process without having been previously allocated comprise **windfall provision** - by means of infill, conversion or redevelopment - and have been an increasingly important numerical contributor to the provision of new dwellings.

The rate at which “windfall” sites come forward is influenced by many factors including market demand and the release of sites previously in non-residential use. It is important to monitor windfall provision as an assessment of past trends and to be able to derive some indication as to likely future supply.

In calculating the level of allocations necessary to meet Structure Plan requirements, an allowance for “Windfall” provision needs to be made. Figure 11 below show the distribution of additional units permitted through windfall permissions in 2010/11.

Figure 11- Windfall Permissions 2010/11 by Sub-Area

Figure 12 and Table 11 below show that in 2010/2011, 56% of dwellings granted through windfall permission were on large sites with a capacity of 10 or more units and 44% were on small sites with a capacity less than 10 units - this is in contrast to last year when the figures were 66% and 34% respectively, and clearly the actual number of dwellings granted through windfall permissions - particularly on larger sites - has decreased slightly relative to the immediately preceding year. The figures for the period 1996 - 2003 relate to both wholly new sites and any variation in the capacity of previously permitted windfall development sites; however, those for 2003/2004, and beyond are for wholly new sites only, in order that a clear picture of the contribution from permissions relating solely to new sites.

Table 11 - Breakdown of windfall sites by Capacity

Year	Small sites (<10)	Large sites (10+)
1997	110	19
1998	163	139
1999	121	84
2000	64	153
2001	106	170
2002	174	313
2003	211	459
2004	115	78
2005	168	446
2006	110	92
2007	118	1003
2008	72	192
2009	197	234
2010	166	320
2011	197	253
Total	1895	3702
Average	135	264

Figure 12- Windfall permissions by Size of Site April 1997-March 2011

Figure 13 shows that of the dwellings granted through windfall permissions 2010/2011, 69% were on PDL sites and 31% on Greenfield sites - in comparison with 88% and 12% respectively during 2010/2011. This breakdown can be compared to completions within this last year on windfall sites by site type (refer to figure 5b) where dwellings completed on PDL windfall sites accounted for 76% of all completions. The principal reason for the large decrease in the windfall permissions on PDL in the current monitoring year is the amendment of the definition of PDL in PPS 3: Housing to exclude private residential gardens.

Figure 13- Windfall Permissions 2010/11 by Site Type

Note:- Conversions of existing, former agricultural buildings as well as residential gardens are included as “Greenfield” sites. A large proportion of rural dwellings granted through windfall permissions this year on Greenfield sites were conversions of existing and former agricultural buildings. Insofar as the permissions granted on Previously Developed Land (PDL) are concerned these comprise land that was generally classed as having been developed previously (i.e. brownfield) such as former garages, industrial premises etc...

Total number of dwellings allocated		2382***		

Key to Table in Appendix B

* Subject to the completion of a Section 106 Agreement

** Partial Completion

*** In SBLP 2001 Proposal HP 17 is not included in the total number of dwellings allocated as it was at that time recorded as a commitment.

UC = Under Construction

C = Completed

NS = Not Started

Definitions

Previously Developed Land (PDL or Brownfield) - as defined in Planning Policy Statement Note 3: Housing (June 2010)

‘Previously-developed land is that which is or was occupied by a permanent structure, including the curtilage of the developed land and any associated fixed surface infrastructure.’

The definition includes defence buildings, but excludes:-

- Land that is or has been occupied by agricultural or forestry buildings.
- Land that has been developed for minerals extraction or waste disposal by landfill purposes where provision for restoration has been made through development control procedures.
- Land in built-up areas such as private residential gardens, parks, recreation grounds and allotments, which, although it may feature paths, pavilions and other buildings, has not been previously developed.
- Land that was previously developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape in the process of time (to the extent that it can reasonably be considered as part of the natural surroundings).

There is no presumption that land that is previously developed will be suitable for housing development nor that the whole of the curtilage should be developed.

Greenfield

Greenfield land for the purpose of this monitor is land, which has not been occupied by a permanent structure, including land in both rural and urban areas. The conversion of agricultural buildings falls within the Greenfield definition as does the development of garden land of existing dwellings.

Expired Planning Permissions 2009/10 & 2010/11

In the current monitoring year there has been a large number of sites that had permissions previously granted, but have not been implemented resulting the permission expiring. The full list of permissions that have expired in the current monitoring year can be viewed in Appendix D of this document.

Key to Tables in Appendix D

Development Type

CR - Conversion from Residential
 CO – Change of Use from Other Use
 CE – Change of Use from Employment (B1-B8)
 NC – Not a Conversion or Change of Use
