

Sustainability Matters in Stafford Borough

Established in 2003 as an umbrella organisation to represent the community in Stafford Borough on issues relating to sustainability.

- We are a non-party-political organisation open to any individual, organisation or business sharing our aims.
- We are concerned that humans are damaging the planet, and threatening its capacity to support life, including humans.
- We see the urgent need to highlight the many problems caused by current lifestyles, and to promote solutions that offer hope to all who share this planet.
- We want to help create a community in Stafford Borough that is environmentally, socially and economically sustainable and is founded on sound ecological principles.

This will be a community in which:

- we all feel a sense of being part of nature and not above it;
- we have an economy which does not aim for constant growth on the conventional model but instead is low-carbon and low-waste, and encourages the local production and distribution of goods and services;
- we strive for a quality of life based on simpler, slower-paced, healthier lifestyles, along with cleaner air, water and soil and greater biodiversity and natural beauty.
