Modification Number	Policy / paragraph	Page Number (in Publication version)	Proposed change
MM12	Para 6.63	33	<p>Amend wording of the first two sentences to read as follows:</p> <p>'A key element of the approach is that new Settlement Boundaries will be established in the <u>Site Allocations Development Plan Document</u> <u>Plan for Stafford Borough</u> for each of the settlements <u>listed in Spatial Principle 3 (SP3), which comprise</u> in the Sustainable Settlement Hierarchy. The boundaries for each settlement <u>in the Sustainable Settlement hierarchy</u> will be established in order to provide sufficient scope for the proposed scale of development of housing, employment and other uses, within the defined settlement.'</p>
MM13	Para 6.64	33	<p>Amend wording of the paragraph to read as follows:</p> <p>'In the case of Stafford and Stone, settlement boundaries are established as part of this Local Plan document in order to identify the significant development areas for housing and employment in relation to the existing urban areas. For the Key Service Villages, The location of <u>settlement</u> boundaries for each of the settlements listed in Spatial Principle 3 (SP3) will be established for these settlements through the Neighbourhood Planning process, or through a Site specific Allocations and Policies document in the Site Allocations Development Plan Document. The settlement boundaries may be established through Neighbourhood Plans in the meantime, but will also be shown in the Site Allocations Development Plan Document. if Neighbourhood Plans are not forthcoming. Prior to the actual definition being achieved through these processes, the criteria established in Spatial Principle <u>7 (SP7)</u> will be used to judge the acceptability of individual development proposals.'</p>
MM14	Spatial Principle 7	33	<p>Amend wording of second sentence to read as follows:</p> <p>'Development or activities of a scale and nature appropriate to secure the sustainability of each settlement, <u>where in the case of housing proposals this is consistent with the delivery of the proportions of development intended by Spatial Principles SP2, SP3 and SP4,</u> will be supported within the Settlement Boundaries.'</p> <p>Amend wording of criterion ii to read as follows:</p>

These have been informed by discussions with agents and landowners of key sites and analysis of historical delivery rates and potential future trends. 			<ul style="list-style-type: none"> • <u>Completions</u> • <u>Outstanding Commitments</u> • <u>SHLAA Sites</u> <p><u>Completions: the housing trajectory includes dwellings already completed between 2011/12 and 2012/13 (2 financial years, i.e. from 1st April 2011 to 31st March 2013). This data has been taken from the Housing Monitor: Land for New Homes 2013.</u></p> <p><u>Total Commitments: this source relates to sites with outstanding planning permission. These sites are divided into two subsets: commitments on smaller sites up to 9 dwellings with the vast majority being below 5 dwellings, and larger sites capable of accommodating 10+ dwellings or more. Delivery rates are those estimated by developers and owners, or estimated by the Council where this information has not been provided to inform the housing trajectory. Development of smaller sites are not subject to significant infrastructure constraints, and thus are assumed to be completed within the first five years of the plan period. Development of larger sites are expected to provide a smaller proportion of new housing in the first 5 years of the Plan period, but housing provision will increase on these sites in years 6 to 15.</u></p> <p><u>Strategic Housing Land Availability Assessment (SHLAA) Supply: sites in the SHLAA include those promoted to the authority by land owners, developers and agents and sites which have been identified by the Council. Each site has been assessed in terms of its suitability, availability and achievability for residential development. The SHLAA contains a large reservoir of sites, including previous Local Plan allocations and the proposed SDLs. The delivery and phasing rates for these sites will be informed by the production of site-specific master plans, but the currently expected rates are identified in the table. These have been primarily based on information provided by developers / agents. Where this is absent, phasing rates have been estimated by the Council.</u></p> <p><u>The housing trajectory itself is a tool that draws together various strands of information on the Borough's position on the supply of new housing, both in terms of previous performance and projected performance against the new Local Plan target. The trajectory, shown for the Borough provides the basis for analysing housing performance and allows the application of a plan, monitor and manage approach. The Trajectory has a number of principal components:</u></p>

			<p><u>Identified For Completion: (identified by the columns within the Trajectory and generated by the identified for completion row of the table)</u></p> <p><u>The projected completions over the first five year period (2013/14 – 2017/18) start from a low base and gradually increase over the period. The principal component of the first five years is made up of the existing committed supply. This comprises sites that are under construction or sites not started. Large quantities of sites with permission are due for completion either within the first five years or shortly after. In addition, within the first five years the existing commitments will diminish as the primary source of new housing and build rates from the Northern, Western and Eastern Strategic Development Locations (SDLs) around Stafford town will provide significant contributions to the delivery of new housing. Delivery timescales for the Western and Eastern SDLs at Stafford have primarily been based on information provided through detailed discussions with the developers, whilst build rates for the Northern SDL at Stafford and the Western SDL at Stone have been estimated by the Council.</u></p> <p><u>The 6 - 15 year element of the plan period extends from 2018/19 – 2030/31. Within this period the pool of committed sites will provide a diminishing source of new housing. SHLAA sites that are considered developable (reflecting the assessment undertaken by the SHLAA Partnership) will provide a source of new housing from 2018/19 onwards. The quantum of housing to be delivered on SHLAA sites reflects the potential for new provision, taking account of the overall historic delivery rates and expected future trends. The delivery of housing from SHLAA sites has been approximately averaged across the period as it is not possible to accurately predict when certain sites will come forward. Also, within this period the Strategic Development Locations (SDLs) will deliver the majority of the housing requirements. Delivery timescales for the Western and Eastern SDLs at Stafford have primarily been based on information provided through detailed discussions with the developers, whilst build rates for the Northern SDL at Stafford and the Western SDL at Stone have been estimated by the Council.</u></p> <p><u>Target: (identified by the yellow target line generated by the target row of the table). The Housing target is the annualised dwelling requirement over the plan period. The Plan for Stafford Borough sets an annual dwelling requirement of 500 dwellings per annum.</u></p>

			<p><u>Managed Delivery Target: the blue manage line (generated by the identified for completion row of the table) is used to monitor under supply or over supply of housing at any one point. It thus enables assessment of whether past shortfalls or surpluses need to be addressed. It is calculated using a residual method and is derived from the total new Local Plan requirement less the cumulative rate of completions divided by the number of years a plan strategy has left to run.'</u></p>
