

What is the buzz about?

We are celebrating Stafford town's bee friendly status and the value bees bring to supporting our natural world.

Bees are known as pollinators as they collect pollen and nectar to feed on.

Pollination enables the next generation of wildflowers to be created. It also supports food production as many crops need pollination to grow.

Pollinators make our lives both beautiful and delicious.

This booklet was designed by

Staffordshire
Wildlife Trust

As part of the Biodiversity Improvement Project funded by

The bee trail was made in collaboration with **Friends of Victoria Park** and

Victoria Park Bee Trail

Pick up a leaflet

Visit the park

Follow the trail map inside

Find out about BEES

Victoria Park Bee Trail

Explore the park to find the matching boards.
Each board contains information about bees that you are likely to find in and around the park, as well as easy actions you can take to help bees at home.

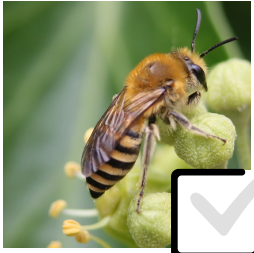

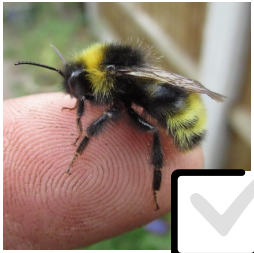

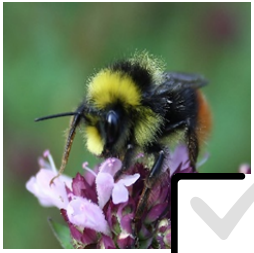

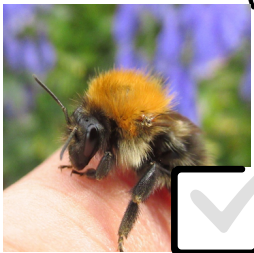

Map Key

-  Trail Information boards
-  Park entrances/exits
-  Stafford Train Station

My favourite bee is...

Can you find all the bees?
